Systems Integrated *ONSITE*® Software Training

Course No. GRPH101   *onSITE®* HMI Graphics Editor Training

Course Overview

This course is designed to provide the student with skills necessary to modify, add or delete new process graphic views using the SI Dataviews based editor. The four-day class will introduce the student to an overview of the both the editor and runtime versions, the concept of graphic objects, sub-drawings, substitution variables, data expressions, data conversions and linking a view to real-time data sources.

Course Details

Duration:	4 Days
Company:	Systems Integrated
Target Attendees:	Control system administrators and engineers responsible for maintaining the system.
Class Size:	Up to 8
Location:	Customer Designated Location or Systems Integrated Location
Prerequisite:	Students should be experienced in computer systems and office applications including databases, graphic editors and spreadsheets.

Main Topics Covered:

- ■ Developing and Implementing Design Standards
- ■ Introducing The Process Graphics Editor
- ■ Working in The Process Graphics Editor
- ■ Working with Objects
- ■ Editing Objects
- ■ Working with Complex Objects
- ■ Adding Text
- ■ Working with Data Variables
- ■ Developing Realtime Graphs
- ■ Working with Dynamics
